1 **ABSTRACT**

2 **Objectives:** Fare capping, a policy in which a transit agency caps the maximum amount a rider pays over a given
3 period, has emerged as a recent innovation in public transit fare policy. The objective of this research is to compile and
4 compare fare capping policies across U.S. transit agencies and to explore potential rider benefits.

5 **Methods:** A multiple case study method was used to examine fare capping policies at the 101 largest transit agencies
6 in the United States. Agency fare policies were identified through publicly available documents, and daily, weekly, and
7 monthly caps were coded for each agency. The analysis calculated the number of one-way adult fares required to reach
8 each cap and compared the resulting discount patterns.

9 **Findings:** As of September 2021, fare capping was adopted by at least 21 of the 101 largest U.S. transit agencies.
10 Most daily fare caps offered little discount for a typical two-trip commuter, but daily caps provided more meaningful
11 discounts to transit-dependent riders, tourists, and other frequent riders.

12 **Novelty:** This paper provides one of the first systematic syntheses of fare capping policies across major U.S. transit
13 agencies. It also introduces a comparative framework based on cap structure, trip thresholds, and rider discount levels.

14 **Practical Applications:** The findings can help transit agencies design fare capping policies that better match rider
15 travel patterns and policy goals. Agencies can use the framework to compare operational contexts, equity goals, and
16 implementation constraints.

1 INTRODUCTION

2 Sed efficitur magna nisl, id aliquet leo molestie et. Quisque vestibulum imperdiet neque, id cursus felis rutrum
3 et. Duis porttitor nisl arcu, sit amet varius justo convallis vitae. Maecenas pretium ullamcorper massa sed volutpat
4 (Smith 2020). Duis libero augue, porttitor sed magna quis, ultrices molestie magna. Nam in orci in dolor accumsan
5 rhoncus ut et leo. Phasellus rutrum enim ut purus lacinia, eget faucibus odio fermentum.

6 Morbi dictum placerat erat ac tempor. Pellentesque elementum accumsan quam. Integer ultricies feugiat
7 placerat. Morbi quis eros et augue iaculis auctor. Aliquam rhoncus lacus ut tortor egestas, in luctus nisl semper.
8 Quisque ultrices sapien turpis, at aliquam est sodales sit amet. Nulla congue risus in ligula aliquam cursus.

9 METHODS

10 Mauris scelerisque maximus viverra. Proin sagittis faucibus viverra. Ut et tellus eros. Mauris sollicitudin
11 porttitor enim vel congue. Quisque dictum ornare posuere. Fusce malesuada rhoncus nisl sit amet rutrum. Vivamus
12 posuere elit dui, eu scelerisque urna interdum sed.

13 Duis ut turpis maximus, semper sapien in, elementum metus. Proin sit amet sem sit amet tortor blandit
14 dapibus. Nam fringilla nunc quis nisl faucibus laoreet. Nam eu elit laoreet, iaculis sem quis, rhoncus libero (Smith
15 and Jones 2020).

16 Level 2 Header

17 Quisque ultrices sapien turpis, at aliquam est sodales sit amet. Nulla congue risus in ligula aliquam cursus.
18 Sed vel augue consequat orci mollis aliquet nec non arcu. Sed scelerisque quam elementum, maximus tortor ut, suscipit
19 arcu.

20 Level 3 Header

21 Fusce malesuada rhoncus nisl sit amet rutrum. Vivamus posuere elit dui, eu scelerisque urna interdum sed
22 (Smith et al. 2020). Etiam quis libero id lacus bibendum interdum. Morbi et pretium lorem (Smith 2021, 25–27).

Figure 1 Caption for figure

23 Maecenas pretium ullamcorper massa sed volutpat. Duis libero augue, porttitor sed magna quis, ultrices
24 molestie magna. Nam in orci in dolor accumsan rhoncus ut et leo. Figure 1 shows the expected placement of figures
25 near the relevant discussion.

RESULTS

Nulla eu urna et erat bibendum venenatis sit amet sed sem. Nam quis quam tempor, placerat turpis a, imperdiet ante. Integer eleifend aliquam magna quis viverra. Nulla consequat sem vitae mi lacinia maximus.

TABLE 1 Measurement Conversion

When You Know	Multiply by	To Find
inches (in.)	25.4	millimeters (mm)
feet (ft)	0.305	meters (m)
yards (yd)	0.914	meters (m)
miles (mi)	1.61	kilometers (km)
acres	0.405	hectares (ha)

Sed eu lacus sit amet risus sodales pretium a ac ex. Donec gravida auctor efficitur. Curabitur maximus pellentesque mollis. Table 1 shows an example table embedded near the text that discusses it.

DISCUSSION

Nunc eros felis, dapibus eu nisl convallis, pellentesque facilisis sapien. Duis vel magna ac ligula rutrum volutpat. Donec sed malesuada ipsum. Morbi sed metus sem. Etiam bibendum posuere elementum.

Equations are left aligned and should be introduced in the surrounding text:

$$\dot{x}_\alpha = \frac{dx_\alpha}{dt} = v_\alpha, \quad (1)$$

$$\dot{v}_\alpha = a \left[1 - \left(\frac{v_\alpha}{v_0} \right)^\delta - \left(\frac{s^*(v_\alpha, \Delta v_\alpha)}{s_\alpha} \right)^2 \right]. \quad (2)$$

Donec libero velit, bibendum sit amet dignissim in, tempus vel lorem. Donec consectetur dui lorem, gravida eleifend metus blandit ut. Fusce metus lorem, volutpat sagittis orci id, lobortis semper lectus.

CONCLUSIONS

Nulla eu urna et erat bibendum venenatis sit amet sed sem. Nam quis quam tempor, placerat turpis a, imperdiet ante. Integer eleifend aliquam magna quis viverra. Nulla consequat sem vitae mi lacinia maximus.
